Cosmic rays are high-energy particles that come from space. Most of these particles are protons. There are other particles in cosmic rays, including atomic nuclei.

**Table 1** gives the data for one particular nucleus **X**.

**Table 1**

Mass / kg	$8.02 \times 10^{-26}$
Specific charge / C kg <sup>-1</sup>	$4.39 \times 10^7$
Kinetic energy / MeV	215
